Lab 6 | Using VIM

Question 2

```
inoquendoosorio@CIS-106VM:~/Lab6$ ls
GNU+Linux.md  linux.md  linux+other.md
inoquendoosorio@CIS-106VM:~/Lab6$ cat linux.md
# What is Linux?
    Just like Windows, iOS, and Mac OS, Linux is an operating system. In fact, one of the most popular platforms on t
he planet, Android, is powered by the Linux operating system. An operating system is software that manages all of the
hardware resources associated with your desktop or laptop.

# 3 Reasons to use Linux:
* Reason 1 - Linux is a free software. You don't have to pay anything to use it. No license fees.
* Reason 2 - Is an open source software. Freedom of use, of distribution and freedom to run the software for any purpo
se.
* Reason 3 - Reliable and lightweight. It is also supported and maintained by an enormous community worldwide.
inoquendoosorio@CIS-106VM:~/Lab6$ cat linux+other.md
